

# SPIDERS TREATMENT

## CLIENT PREPARATION SHEET

Before our arrival please review and complete all the necessary preparations listed below. These steps will ensure that your Technician is able to provide an effective and safe treatment.

### How To Prepare For Your Treatment

#### KITCHEN

No food should be exposed in all areas. Ensure that the kitchen is clean and that food items are sealed in containers. Keep garbage and food residue to a minimum and throw out your garbage daily and ensure dirty dishes are not left out overnight.

#### GENERAL

In all rooms: move all furniture at least 2 feet away from the wall, heaters and radiators so spray can be applied to baseboard perimeters. Children's toys should be placed in plastic bags or placed in cupboards.

#### BATHROOM

Access to all plumbing lines under sinks is required; please have all items in cupboard below the sink cleared out.

#### STORAGE AREAS

Linen, broom and clothing storage closet floor perimeter areas must be cleared of all items. These items can be placed on the bed.

#### PETS

Birds and Pets must be removed from the premises for 4 hours. Fish tanks and pumps must be covered and the pumps turned off for 8 hours.

#### EXTERIOR OF THE HOME

Move all planters, patio furniture etc 2 feet away from the walls of the home. Remove items and debris from moist dark areas such as porches, in window well and around rock gardens to allow access to the Technician.

---

## After Your Treatment

---

The products applied will only be effective if the following steps are taken after your home is serviced:

- **DO NOT** use other pest control chemicals (powders or sprays) or cleaning products near areas that have been sprayed, as this will decrease or eliminate the effectiveness of the treatments.
- Vacuum after treatment, especially along the baseboards. Use crevice tool to get into corners and cracks. Remove insect remains.
- Eliminate the leaf litter from the exterior perimeter.
- Follow the Technician's recommendations for any repairs needed to close entry points.
- Upon re-entry to your home, do not wash any of the baseboards for a period of at least four weeks. The pesticide residual effects lessen by washing.
- Wash off kitchen counter tops, bread board, refrigerator and stove tops with soap and water.
- You may put back all kitchen items after the re-entry time as advised by your Technician.

---

## Reminder

---

### ONLY IF SPRAY IS USED FOR INTERIOR:

**It is necessary for you or your pets to leave your home during the treatment and for 4 hours after the treatment.** Anyone who has allergies, asthma, is pregnant, children under the age of 4 or anyone with respiratory problems should consult their family doctor where they have concerns regarding the re-entry times. Upon re-entry, open the windows for 20 minutes to properly ventilate the treated rooms.

### ONLY IF SPRAY IS USED FOR EXTERIOR:

It is necessary for you to keep your windows and doors closed during the spray application outside. Stay away from the exterior perimeter of the building until the treatment is dry (1 hour).

---

## What You Can Expect From Your Treatment

---

Your Technician will use a variety of methods to control the pest depending on each unique situation. Liquid spray will be used and is the most effective treatment to take control. All treatments will be made with your safety in mind to ensure your health.
