

WASP/CARPENTER BEES TREATMENT

CLIENT PREPARATION SHEET

Before our arrival please review and complete all the necessary preparations listed below. These steps will ensure that your Technician is able to provide an effective and safe treatment.

How To Prepare For Your Treatment

EXTERIOR OF THE HOME

Move all planters, patio furniture and any other furniture items that are near the nest, if safe to do so.

Never seal the entry points of where wasps have been seen going into the brickwork, soffits etc. Vibrations and sudden movements around a nest will activate the response of wasps to sting.

Keep your pests away from nest that are low to the ground and are in the garden.

After Your Treatment

The products applied will only be effective if the following steps are taken after your home is serviced:

- DO NOT use other pest control chemicals (powders or sprays) or cleaning products near areas that have been sprayed, as this will decrease or eliminate the effectiveness of the treatments.

Reminder

It is not necessary for you or your pets to leave your home during or after the treatment.

What You Can Expect From Your Treatment

Your technician will use a variety of methods to control the pest depending on each unique situation. Liquid spray will be used and is the most effective treatment to take control. All treatments will be made with your safety in mind to ensure your health.

All persons and pets are to be kept away while the Technician is treating the area.
