

CLOTHS MOTH TREATMENT

CLIENT PREPARATION SHEET

Before our arrival please review and complete all the necessary preparations listed below. These steps will ensure that your Technician is able to provide an effective and safe treatment.

How To Prepare For Your Treatment

LIVING ROOM, BEDROOMS, CLOSETS ETC

Vacuum all rugs, carpet and upholstered furniture. Vacuum bag should be discarded immediately upon completion.

Any unlaundered wool or natural fibre clothing should be laundered or at least placed in a hot dryer for one hour. Make sure you follow all label recommendations before laundering.

Move all furniture 12" (30 cm) away from the walls. Please be sure to exercise safety first and do not attempt to move very large furniture.

Empty all closets that are experiencing the pest issue or signs of activity.

After Your Treatment

The products applied will only be effective if the following steps are taken after your home is serviced:

- **DO NOT** use other pest control chemicals (powders or sprays) or cleaning products near areas that have been sprayed, as this will decrease or eliminate the effectiveness of the treatments.
- Vacuum appropriately
- Avoid waxing or washing floor surfaces, especially the edges for at least 2 weeks after treatment. Do not steam clean carpets. Vacuum as usual
- Wash off kitchen counter tops, bread board, refrigerator and stove tops with soap and water.

Reminder

It is necessary for you or your pets to leave your home during the treatment and for 6 hours after the treatment. Anyone who has allergies, asthma, is pregnant, children under the age of 4 or anyone with respiratory problems should consult their family doctor where they have concerns regarding the re-entry times. Upon re-entry, open the windows for 20 minutes to properly ventilate the treated rooms.

What You Can Expect From Your Treatment

Your technician will use a variety of methods to control the pest depending on each unique situation. Liquid spray will be used and is the most effective treatment to take control. All treatments will be made with your safety in mind to ensure your health.
